

Mare Directory

The Mare Directory is a new segment to the AHHA Holsteiner Directory and Breeders Guide. This directory represents the mares that have been activated for breeding in 2004 as of the date of publication of this guide. Mares are listed in one of six sections, based on their performance at an AHHA Approvals Inspection:

Main Mare Premium Select: Mares in this category have scored a minimum of 50 bonit points, have received a minimum score of seven in type and no score lower than a six.

Main Mare Premium: Mares in this category have scored a minimum of 46 bonit points, and have no scores lower than six.

Main Mare: Mares in this category have scored a minimum of 43 bonit points, and have no scores lower than five.

Mare: Mares in this category have scored a minimum of 39 bonit points with no scores lower than four. At this time, only Holsteiner mares may enter the Mare Book, although non-Holsteiner mares already in the Mare Book remain so.

Provisional Mare: Mares in this category must score a minimum of 39 bonit points. Mares in this category are those mares not qualified for entry into the other mare books due to pedigree, height, or other reason outlined in the Breeding Rules in this book. Offspring produced by these mares, if sired by an approved and activated AHHA stallion, are eligible for Certificate of Pedigree only.

Not Inspected: Mares in this category have not been inspected at an AHHA Approvals Inspection. Offspring of these mares are not eligible for registration until the mare has been inspected and receives at least the minimum required bonit score. Mares in this category that breed to AHHA approved and activated stallions are still eligible to get Certificates of Pedigree for their offspring. These Certificates of Pedigree may be upgraded to full registration papers if the mare is later inspected and enters one of the AHHA mare books (other than Provisional).

Stamms

The Holsteiner Verband has long recognized the importance of a mare's breeding and pedigree in breeding quality sporthorses. For this reason, they developed a system of tracking and recognizing the mare's line of breeding. Through using Stamms, Holsteiner owners can trace the mare line of their horse back to the origin of that mare line. There are several stamm types in use:

German Stamms: These stamm lines are traceable back to Germany and a German Holsteiner mare. The first placeholder in a German stamm number is a number. Only the German Holsteiner Verband is able to issue new German stamms.

"A" Stamms: These stamm lines are traceable back to a non-Thoroughbred, Warmblood mare.

"H" Stamms: These stamms are issued in the rare case that a Holsteiner horse has been imported from Germany prior to the German Holsteiner Verband issuing a stamm for this line. The AHHA, in consultation with the Holsteiner Verband, issues an H Stamm.

"P" Stamms: These stamms are traceable back to a mare that was in the AHHA Provisional Mare Book that was later upgraded to another book through breeding quality.

"Q" Stamms: These stamm lines are traceable back to a Thoroughbred mare.

Reading Bonit Scores:

Each place in the bonit score represents one aspect that the judges grade in an AHHA Approvals inspection. The seven scores are then followed by a total figure. The seven aspects graded (in order that they appear in the bonit scores) are:

Type
Topline
Front Legs
Hind Legs
Walk
Trot
Canter
